Q&A

Q: What is the difference between “Single-Term” and “Multi-Term” access codes?

A: The biggest difference is the semesters of access that each allow. Multi-Term codes are needed for multiple semester access to courses like Calculus or Physics. The pricing is also different, with Multi-Term codes being more expensive due to their length of use.

Q: What does Life of Edition mean?

A: Life of Edition (LOE) means that students will have access to their EWA course as long as the course uses the same book and edition. This allows students that fail a course to be able to retake it without needing to repay for access.

Q: What are the consequences of using a single-term code with a multi-term course like Calculus or Physics?

A: If a student uses a code designed for a single term course to open a multi term course, it does NOT provide Life of Edition access. It ONLY provides one-time, single term access to that multi-term book. Students will be locked out and asked to pay again the second semester. Students will also need to repay for access in the event that they fail the course.
