**In this chapter,
look for the answers to these questions:**

- § How does a tax affect consumer surplus, producer surplus, and total surplus?
- § What is the *deadweight loss* of a tax?
- § What factors determine the size of this deadweight loss?
- § How does tax revenue depend on the size of the tax?

1

Review from Chapter 6

- § A tax
 - § raises the price buyers pay and lowers the price sellers receive.
 - § reduces the quantity bought & sold.
- § These effects are the same whether the tax is imposed on buyers or sellers, so we do not make this distinction in this chapter.

APPLICATION: THE COSTS OF TAXATION 2

The Effects of a Tax

Eq'm with no tax:
 Price = P_E
 Quantity = Q_E

Eq'm with
 tax = $\$T$ per unit:
 Buyers pay P_B
 Sellers receive P_S
 Quantity = Q_T

APPLICATION: THE COSTS OF TAXATION

3

The Effects of a Tax

§ Next, we apply welfare economics to measure the gains and losses from a tax.

§ We determine consumer surplus (CS), producer surplus (PS), tax revenue, and total surplus with and without the tax.

§ Tax revenue can fund beneficial services (e.g., education, roads, police) so

8

About the Deadweight Loss

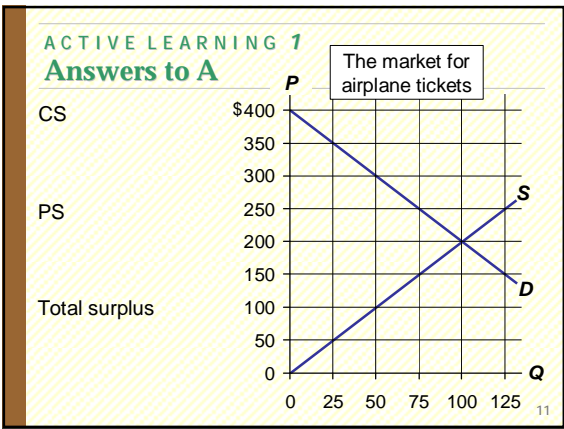

Because of the tax, the units between Q_T and Q_E are not sold.

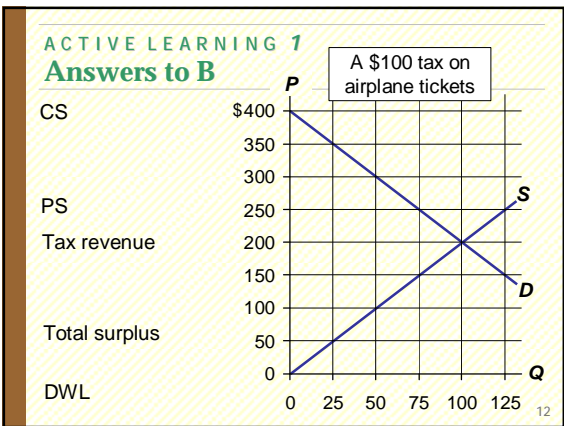

APPLICATION: THE COSTS OF TAXATION

9

What Determines the Size of the DWL?

§ Which goods or services should govt tax to raise the revenue it needs?

§ One answer:

§ When is the DWL small vs. large?
Turns out it depends on

§ Recall:
The price elasticity of demand (or supply) measures

APPLICATION: THE COSTS OF TAXATION

13

DWL and the Elasticity of Supply

When supply is inelastic,

APPLICATION: THE COSTS OF TAXATION

14

DWL and the Elasticity of Supply

The more elastic is supply,

15

ACTIVE LEARNING 2
Elasticity and the DWL of a tax

Would the DWL of a tax be larger if the tax were on:

- A. Breakfast cereal or sunscreen?
- B. Hotel rooms in the short run or hotel rooms in the long run?
- C. Groceries or meals at fancy restaurants?

18

ACTIVE LEARNING 2

Answers

A. Breakfast cereal or sunscreen

19

ACTIVE LEARNING 2

Answers

B. Hotel rooms in the short run or long run

20

ACTIVE LEARNING 2

Answers

C. Groceries or meals at fancy restaurants

21

ACTIVE LEARNING 3
Discussion question

§ The government must raise tax revenue to pay for schools, police, etc. To do this, it can either tax groceries or meals at fancy restaurants.

§ Which should it tax?

22

How Big Should the Government Be?

§ A bigger government provides more services, but requires higher taxes, which cause DWLs.

§ The larger the DWL from taxation, the greater the argument for smaller government.

§ The tax on labor income is especially important; it's the biggest source of govt revenue.

§ For the typical worker,

§ How big is the DWL from this tax?
It depends on elasticity....

APPLICATION: THE COSTS OF TAXATION

23

How Big Should the Government Be?

§ If labor supply is inelastic,

§ Some economists believe labor supply is inelastic, arguing that

APPLICATION: THE COSTS OF TAXATION

24

How Big Should the Government Be?

Other economists believe labor taxes are highly distorting because

25

The Effects of Changing the Size of the Tax

§ Policymakers often change taxes, raising some and lowering others.

§ What happens to DWL and tax revenue when taxes change? We explore this next....

APPLICATION: THE COSTS OF TAXATION

26

DWL and the Size of the Tax

Initially, the tax is T per unit.

Doubling the tax

APPLICATION: THE COSTS OF TAXATION

27

DWL and the Size of the Tax

Initially, the tax is T per unit.
Tripling the tax

APPLICATION: THE COSTS OF TAXATION

28

DWL and the Size of the Tax

Implication

When tax rates are low, raising them doesn't cause much harm, and lowering them doesn't bring much benefit.

When tax rates are high, raising them is very harmful, and cutting them is very beneficial.

Summary

APPLICATION: THE COSTS OF TAXATION

29

Revenue and the Size of the Tax

When the tax is small,
